OFFICIAL CUSTOMER COMPLAINT INTAKE REPORT

Complaint ID: CMP-2026-0891	Intake Date: 2026-03-10
Reported By: Dr. Eleanor Vance (Chief Pharmacist)	Incident / Event Date: 2026-03-08
Facility Name: St. Jude Memorial Hospital	Contact: e.vance@stjudememorial.org / +1-555-019-2834

1. PRODUCT IDENTIFICATION & LOT TRACEABILITY

Product Name	Ceftriaxone Sodium for Injection USP
Dosage & Strength	1 g / vial (Dry powder for reconstitution)
Dosage Form / Type	Sterile Lyophilized Vial for IV/IM
Batch / Lot Number	CTX-2025-098B
Manufacturing Date	2025-08-14
Expiration Date	2027-08-31
Quantity Affected	24 vials (from Box 03 of Carton 12)
Manufacturing Site	[NOT PROVIDED BY REPORTER - PENDING QA LOOKUP]

2. DEFECT STATEMENT & CLINICAL OBSERVATIONS

During pre-administration preparation in the Intensive Care Unit (ICU), the attending clinical nurse reconstituted vials of Ceftriaxone 1g (Batch CTX-2025-098B) using 10 mL Sterile Water for Injection USP under laminar flow. Upon visual inspection under direct light, visible dark particulate matter and suspended fibers were observed floating within the reconstituted solution in multiple vials. Furthermore, slight amber discoloration was noted in 4 adjacent unconstituted vials from the same pack. The administration was immediately halted prior to patient infusion. No adverse drug reaction or patient harm occurred. All 24 vials from this carton have been segregated into quarantine storage at 2-8°C awaiting QA disposal or return authorization.

3. REPORTER HAZARD CATEGORIZATION

Defect Classification: Physical Contamination / Foreign Particulate Matter in Sterile Injectable.

Critical Patient Safety Alert: Intravenous administration of particulate-contaminated parenteral solutions poses high risk of microvascular pulmonary embolism, localized inflammatory phlebitis, or systemic antigenic reaction.
